audioengine 5

Real Speakers for Portable Audio Players

Audioengine 5 Features

- iPod power charging port (Audioengine Combo Port)
- 2 audio inputs
- Built-in power amplifier
- Power outlet for Airport Express
- Front panel volume control
- Custom Kevlar woofers for super low end
- Silk dome tweeters for smooth highs
- Built-in subwoofers
- Hand-built and tuned cabinets w/high-gloss piano finish
- Magnetically shielded
- 3 year transferable warranty
- All cables included

Finally, real speakers designed for portable audio players that deliver astonishing audiophile-quality sound (and don't cost a fortune).

Huge Sound, Small Size
Audioengine 5 is a full-size speaker system in a bookshelf-sized package. Internal power amps eliminate the need to connect the Audioengine 5 to a bulky stereo receiver or power amplifier. And with built-in subwoofer ports, the Audioengine 5 adds incredible low-end bass without the need for an external subwoofer.

Airport Express Power
With an AC power jack in the rear panel, the Audioengine 5 provides the ability to stream music from your laptop directly to the speakers through Apple's Airport Express. The rear panel AC outlet is also ideal for providing power to other portable or home A/V equipment. A 2nd auxiliary mini-jack is located nearby for audio input from the Airport Express or other products. We've also included plenty of cables in a drawstring bag to connect all your gear.

Built-in iPod Charging
Designed for optimal ease of setup and versatility, the Audioengine 5 has a built-in Combo Port for iPod charging while listening to your music or watching movies. Plug an iPod Universal Dock or iPod directly into the Audioengine 5 Combo Port and you're ready to rock (or roll). The Combo Port is compatible with all iPods as well as other portable audio players and products that charge via USB (PSP, phones, PDAs, etc.).

Brawn, Brains, and Beauty
Kevlar woofers for powerful bass, silk dome tweeters for smooth highs, built-in power amplifiers, truly useful connections, and a clean industrial design all allow the Audioengine 5 to integrate perfectly in your living room, bedroom, or desktop. Custom-designed and handcrafted wood cabinets with high-gloss professional piano finish make the Audioengine 5 a true work of art.

Compatible with and designed for

- iPod nano and iPod video
- Other MP3 players/portable audio players
- Airport Express
- Apple Universal Dock
